## Amendments to the Specification:

SCP 1 4 2006

Please replace the paragraph beginning at page 1, line 6 with the following amended paragraph:

—This application is a continuation-in-part of United States patent application number 09/978,595 filed October 18, 2001, now United States patent number 6.650,930, and claims priority from Canadian patent application number 2,324,048 filed October 20, 2000. The contents of these prior applications are incorporated herein by reference.—
